ENCLOSURES: None

ORR REQUIREMENT NO. RR/HTA/E/R108/56: Locate oil drilling equipment or other evidence of reported intensive oil explorations in NE Hungary between the cities of Miskolc (48°05' N, 20°47' E) and Kecskemet (46°55' N, 19° 42' E).

REMARKS:

The area between Miskolc and Kecskemet, 100 miles long and 35 miles wide, was searched for photographic evidence of oil exploration activity. The area surrounding the cities of Miskolc, Szolnok (47°10' N, 20°10' E), and Mezokeresytes (47°49' N, 20°42' E), where oil exploration had been specifically reported, received intensive study.

The only indications of oil exploration discovered in the entire area are five oil derricks in the vicinity of Szolnok. Three of these derricks are located 2½ miles SW of the center of Szolnok, one is located 5 miles SW, and the other 6½ miles SW of Szolnok. Associated with each derrick are two small slush-pits and a few sheds.
